WOOD STOVES PROCEDURES

When an applicant is looking to install ANY TYPE of wood stove into the fireplace or connect it into an existing chimney, the following MUST be done PRIOR to the issuance of the Permit and or the utilization of the wood stove ...

1. A certificate from a chimney cleaning company stating that they have cleaned and have examined the chimney and found it to be safe to use.
2. The Building Permit is to be obtained BEFORE the unit is installed and inspected BEFORE it is inserted into the fireplace.
3. The Installation Book is to be on the site at the time of inspection.
4. In accordance with 527 CMR 31.00 a Carbon Monoxide Detector is required to be installed at time of inspection.
5. **THE WOOD STOVE IS NOT TO BE OPERATING UNTIL AFTER THE INSPECTION IS PERFORMED.**

WOODSTOVE INSERTS

1. **They are to be inspected PRIOR TO THE UNIT BEING INSERTED INTO THE FIRE PLACE.**

INSTALLING WALL PROCTECTORS

If a Wall Protector is to be used, a drawing of how it is going to be constructed must accompany this application. The Wall Protector **must** meet CABO 1&2 Family Building Code and NFPA 211.

EFFECTIVE IMMEDIATELY

A Woodstove **cannot** vent into a chimney used by either an oil fired furnace or one by gas. They must vent into a flue solely used by the woodstove only.
