#### APPROPRIATIONS, 1887.

The following sums are recommended to meet current expenses the year ensuing :

Support of schools,	\$1,200 00
Support of poor,	1,400 00
Repair of highways,	1,200 00
Repair of bridges,	200 00
Repair of school-houses,	50 00
School-books, etc.,	150 00
Town incidentals,	550 00
Repair of almshouse,	200 00
New roads,	No estimate.

The corporation and bank tax will probably yield about \$1,000.

## SCHOOLS.

There is a balance of \$243 94 undrawn in this account, with the expense of five schools yet to meet. Owing to the death of the trustee of the Pratt fund, the income has not been received, but as soon as another trustee is appointed, it will undoubtedly be available to pay bills contracted by the committee.

## HIGHWAYS.

In this account a balance of \$142 81 is undrawn, a part of which has been expended, but the bills have not been presented.

## BRIDGES.

In this account there is a deficiency of \$107 45, occasioned by the large expense of the Swan Hole bridge. To meet this deficiency and keep the bridges in repair the coming year \$200 will be required.

## SNOW.

No appropriation is called for in this account. The sum unexpended, \$44 89, it is thought will meet the expenses of removing snow the past winter.

## REPAIR OF SCHOOL-HOUSES.

An appropriation of \$50, together with the unexpended balance, \$147 34, of last year, is thought ample to keep the school-houses in repair.

## SCHOOL-BOOKS, &amp;c.

This account stands overdrawn \$19 84. An appropriation of \$150, same as last year, is thought ample.

## POOR.

The net cost of the poor to the town is \$1,534 07, an excess of rising \$200 over last year. This is mainly due to sickness and increasing infirmity. The net cost of supporting six at the almshouse, excluding cost of repairs, is \$2 24 per week. Including the repairs, it will be \$2 88 per week. The expense of the Robery family is large, and judging from present appearances, is more likely to increase than diminish. Owing to the large number of crippled and infirm inmates at the almshouse, it was found necessary to finish another room and make other repairs. Still it seems necessary to do considerable more the coming year. The window frames are badly decayed, the house needs re-shingling and new floors in some rooms. It is thought advisable to make a specific appropriation instead of placing it in the poor account as heretofore. We call for \$200 for repairs and \$1,400 for maintenance.

## TOWN INCIDENTALS.

There is a deficiency of \$48 74 in this account. To meet this and the expenses of the ensuing year, we recommend an appropriation of \$550.

## NEW ROADS.

There is a small deficiency in this account. Should new roads be laid out, as now seems likely to be the case, another appropriation must be made.

## NEW TOWN HOUSE.

Ten years ago the subject of building a town house was agitated and recommended by the selectmen, but not brought before the town for action. To-day that ideal town house exists in fact. Wise counsel, mutual concessions, and placing the matter of building in the hands of a committee competent and desirous of carrying out the

votes of the inhabitants to the letter, have been the means of accomplishing this much desired object, and in a satisfactory manner. Of the \$2,000 appropriated, \$1,795 19 only was required to erect the building and furnish the same.

In review, our financial condition may be summed up about as follows: We have \$1,627 88 cash in the treasury. Assets over liabilities, \$1,861, or about one-half the sum of last year. This decrease, of course, is mainly due to the working up of \$1,300 of last year's surplus into the town house. The cheering fact presents us that, notwithstanding our town has lost two-thirds of its manufacturing industry in the past seven years, the valuation remains nearly the same, and without any marking up. So we mourn not as those without hope, but live in the faith that those five hundred acres of cranberry bog in town still float us upon the great sea of human existence.

Respectfully submitted,

ANDREW GRIFFITH,	}	<i>Selectmen of Carver.</i>

## Report of the School Committee.

---

*Citizens of Carver* :—In accordance with the expressed wish of the town by vote at the last annual meeting, your Committee on Public Schools would submit their report for the past year at this time, that the same may be included in the same publication with the other town officers; and in order to include each term of school for all the districts, have been obliged to extend the time from March 1st, as per vote of the town, to March 11th, which is the date at which schools No. 4 and 8 closed; and therefore it will oblige your committee to transmit a hurried copy for publication. Believing that a report embracing all the terms for the year will give a much better satisfaction than a partial one, and that the voters may understand better what the schools may require for another year, we accept the disadvantage and will endeavor to fill the obligation incumbent on us. With the above introductory remarks, we will give you the financial exhibit of the town for the past year :

DR.

Money appropriated for use of schools the past year :

Raised by taxation,	\$1,200 00
Received from State school fund,	213 16

## GENERAL REMARKS.

It is with some diffidence that we address you on matters pertaining to education at this time, but being in an official capacity where it is necessary for us to report on the condition of the schools and their needs and requirements, we will offer a few thoughts and suggestions in relation to the same, which we think may be of interest to the town, and which we hope may tend to increase the interest of her citizens in its common schools. Your money has been expended the past year, as in former years, in maintaining eight schools for an equal length of time—thirty weeks each—and your committee would assume that in their judgment they have expended the same as judiciously as under the existing circumstances it was possible for them to do. They are well satisfied with their efforts, and believe the schools generally are making rapid advancement. There is thoroughness and system, and we have had a board of teachers the past year who, with a single exception, are well qualified for the positions they occupy, and who, with their privileges, have done good work; four of whom the town has become so familiar with already from their long term of service in this capacity in this town that they need no introduction and no words of recommendation from us. We would refrain from speaking of them personally, although they deserve an honorable mention at the hands of your committee, fearing such comparison, as is too often the case in such an effort, might be an injustice to the person whom it should be our duty to favor. From the above we would not have you infer that we are perfectly satisfied in all particulars with the efforts of our teachers. That they are liable to err and are human, as ourselves, we must acknowledge. There is not one but what has pleasantly received suggestions for improvements from the committee,

and readily adopted the same, and have apparently exerted their utmost ability for success.

### STUDIES.

Physiology and hygiene, which, prior to the present law making instructions in the same obligatory, had become almost obsolete in the town, are now being taught in all the schools, and books have been procured in accord with the law.

Book-keeping has received an earnest attention in District No. 8 during the past year, and in several other districts. Drawing books have been introduced, and show some commendable results.

All the schools have shown an earnest endeavor to excel in the usual branches during the past year, writing, grammar, geography, mathematics, history, &c., receiving an appropriate attention and showing great progress.

### TEXT-BOOKS.

The books furnished by the town for schools are accounted for by the teachers of the respective schools in an account book for the purpose. Each pupil is charged with the books he uses and credited on return of same.

### REPAIRS.

By a vote of the town two years ago the repair of school-houses was placed in the care of your selectmen, and by authority of said vote they have continued their jurisdiction over the same for the past year, to the pleasure of your school committee. The appropriation for same has been mainly expended on the ordinary outside repair of houses, including shingling of one side of roof of No. 4, Grammar school building, and also of one side of roof of No. 5. From a lack of appropriation they were obliged

to limit their repairs to actual necessities, and the inside of rooms has not received the attention which they should. Perhaps no room is free from some defect which needs the laying-out of some expense to continue the healthfulness and convenience of the room. It is desirable to improve the inside appearance of the North Primary school-room, which we think requires a thorough renovation. It is also desirable to refurnish with new and modern furniture. The ceilings of rooms used for the Grammar school of same place and School No. 3 should receive some attention. No. 4 Primary school needs and should have at once new blackboard accommodations. Believing this room unsuitable and inconvenient for the purposes for which it is used, and thinking that the town will at an early day provide more suitable accommodations for said Primary school, we would not advocate a large outlay on this room. No. 8 requires some attention in the repair of seats and blackboards. We believe it to be for the best interest of the town, and especially so for the schools, that the rooms for instruction be kept in good repair, neat, and in order, and that it will preserve the interest of all connected with it; neither do we believe that the town really desires the least outlay possible in the repairs and furnishings made on and in the school-houses, to the detriment of the looks, convenience and healthfulness of the same. We will ask that a liberal appropriation be made for above purposes.

#### SICKNESS.

Sickness has prevented attendance to a considerable extent in a number of the schools. The second term of the South Primary was broken up entire for two weeks by disease.

## ABSENTEEISM.

Citizens, it is in your power to make the schools a success. Your individual efforts are necessary, and with them applied in the right direction, you may see what you desire to see. Absenteeism is the bane of our common schools. With it no school is a success, while a teacher may labor doubly hard, their efforts are not crowned. Do not blame your teachers or your committee for what you yourselves are doing. You are laying the foundation on which they act, neither have they the power to act on a different. We have gathered from the registers of the schools some statistics which we wish you to ponder upon and then tell us if you can who is to blame for the large discount in the average of attendance from the whole number, and how it is, when the statutes of Massachusetts declare that you shall give every child between the ages of eight and fourteen years at least twenty weeks of schooling, that, not with our thirty weeks, sixty per cent. of said children receive the twenty weeks as provided, and that with a penalty hanging over your heads. Is there anything that will break this lethargy? Law will not do it, although it may assist. It is with yourselves. You must feel the importance and the necessity of the work. Your children must be in their places and your neighbor's children must be in theirs. Allow your child one day to vacate the school on a frivolous excuse, and you have opened the way for more days, and that your child is away will create an uneasiness on the part of others who may, on similar excuses receive the black stroke on the register and be reduced to the same tendency as yours. In submitting this report, will pledge to the town our most earnest co-operation in the promotion of its educational interests.
