REPORT OF THE SUPERINTENDENT

To the School Committee of Carver :

I herewith submit my first annual report as Superintendent of Schools.

The High and Grammar schools opened on September 10th, this being an earlier date for the seventh and eighth grades than has been customary. It would seem feasible another year to open all the schools at this time, as the number of children employed this season was negligible and in case of breaks caused by epidemic conditions, or bad weather, this would obviate keeping late in June.

Mr. McLeod and Miss Spoul resigned to go to West Bridgewater. After much consideration Mr. Herman A. Richter, of Randolph, and Miss Marjorie K. Love, of Brockton, were selected to fill the positions and their work has been highly satisfactory. The spirit of the school has continued to be excellent and the pupils are showing an increasing interest in their work.

The vacancy of the North Carver School due to the resignation of Miss Sampson was filled by the election of Miss Blanche Savary, of Wreham. The crowded condition of this school made it necessary to open a third room. This was accomplished by fitting up the back part as a class room and the Bates Pond School was closed and Miss Cornish transferred to North Carver.

The South Intermediate room was overcrowded also and the matter of relief awaited settlement as no suitable accommodations presented themselves. After much deliberation it was decided to transfer Popes Point School to the North; reopen Bates Pond for grades five and six, and this was accomplished upon the reopening of the schools after Christmas.

This arrangement gives us a well graded system of two grades to a teacher in all our schools, and with slight changes in the transportation system should give satisfaction until such time as the town will build a new building at the South

to which the pupils now at Bates Pond may be taken. This building should be modern as regards heating and ventilating and afford proper facilities for indoor play in bad weather.

The lighting of the North, Center and South buildings and the furnishing of running water have been highly commendable. The old system of water in jars brought from the neighbors and the use of glasses with no proper facilities for their care was hygienically unsafe, and the town is to be commended for the advance step.

This year the State has issued a Health Record Card, the use of which is compulsory. This necessitates a more thorough medical examination and follow up work upon the part of the school nurse. This work has been demonstrated to be of the greatest value in city and suburban schools though new in the rural districts. Our children surely deserve at least as much health and happiness as city children. Statistics presented by the National Education Association and the Council on Health and Public Instruction of the American Medical Association shows their greater need of attention.

If rural America is to continue to be a satisfactory nursery of human life for the nation it must be made healthful and attractive; it must provide conditions favorable for the cultivation of the best. The improvement of human health and welfare in rural America is a problem of the greatest significance in relation to our National Welfare. It is a problem affecting our national safety, material prosperity, national perpetuity. It deals with the most essential and most endangered of all our national resources. No factor is of greater fundamental importance for securing national preparedness either for peace or for possible war.

In the control of communicable disease we must have the thoughtful care and sympathetic cooperation of home and school. No child should ever knowingly be exposed to contagious disease. The older the child is before exposure the less apt he is to take the disease and the less severe, on the average, is it likely to be. We need then thoughtful and conscientious help of the parents. They should be on the alert for the fol-

lowing indications of health disorders for which the child should be kept at home and the physician or school notified.

Nausea or vomiting	Running of the nose
Chill, convulsions	Red or running eyes
Dizziness, faintness	Sore throat
Eruption (rash) of any kind	Swollen glands
Fever	Cough

In case these signs appear, the only safe way is to keep the child at home until the proper health officer has authorized the pupil's return to school.

The prompt response by parents to the notices of defective conditions particularly of defective teeth is imperative if our children are to derive the fullest benefit from the schools. Parents should see to it that the child's teeth are cleaned at least every three months by the dentist or by a trained dental hygienist. It has been repeatedly shown that such treatment will prevent most of the decay of teeth which takes place. All decayed teeth whether temporary or permanent should be filled or otherwise treated.

To make sure that no discrimination occurs the following Health Regulations have been established by the Committee.

No child who is ill with a contagious or infectious disease shall attend school until he has been admitted by the school physician, or upon the statement of the attending physician that all danger of contagion has passed. This may be given by telephone, but shall be immediately confirmed in writing.

In case a child has been ill and no doctor has been consulted, the parents must notify the school authorities and the school physician or the school nurse shall determine whether the child may be admitted.

The interest in the courses in millinery and dressmaking continues strong and classes in both have opened at the North and the Center, and a class in millinery at the South. The advisory board this year consists of Mrs. Eleanor Shaw, Mrs. Arthur Wade, and Mrs. Alice Shaw. I wish to express my

appreciation of their helpfulness, and also of the kindness of Mrs. Stoddard in opening her new home for the millinery class at the North. These classes are well worth the support of the citizens and in no way should they be regarded as charitable.

Arrangements are underway to open classes in dress-making in the Bates Pond and Pope's Point sections. This work should have the hearty support of the town and is well worth the expenditure which the town is called upon to make.

In closing I wish to express my appreciation of the cordial reception and hearty cooperation given me by the teachers and the committee.

Respectfully submitted,

ARTHUR B. WEBBER.
